NOTE

To avoid any misunderstanding caused by exchange rate fluctuations, I have included prices in both EUR and DKK. The EUR price is my reference price, while the DKK price is provided for display and sales purposes in Denmark. I kindly request that payment upon sale be settled according to the listed EUR price.

The prices listed in this document are the artist's net prices and do not represent the final retail prices.

Guldagergaard will determine the final retail price in DKK by applying its agreed 20% commission to the artist's net price.

Upon the sale of an artwork, the artist will issue an invoice for the listed EUR amount.

The invoice will be issued in accordance with the applicable Belgian and European VAT regulations. Where applicable, Belgian VAT (currently 6%) will be charged. For invoices issued to VAT-registered businesses within the European Union, the reverse charge mechanism applies, provided a valid VAT number is supplied.

No discounts may be applied without the artist's prior written approval.
